What is the HALSO Sofuels Capital Growth Partnership?

📌 The HALSO Sofuels Capital Growth Partnership is our flagship capital growth programme, designed for people who want more from their hard-earned money over a short, fixed period.

With the rising cost of living, an uncertain economic climate, and banks and ISAs delivering increasingly negligible returns, more savvy individuals are looking for smarter ways to get ahead. That's exactly where the HALSO Sofuels Capital Growth Partnership comes in.

Whether you are a seasoned investor or completely new to investing, and whether or not you have experience in the energy sector, this partnership is structured to work for you.

Why the HALSO Sofuels Capital Growth Partnership is so popular

👤 With no barriers to entry, this programme allows your capital to work hard for you while you continue with your day-to-day life.

We understand that most people live fast-paced, demanding lives. That's why we take care of the heavy lifting. This partnership requires minimal input from you, while offering full transparency around how your capital is deployed.

Your money is actively put to work from day one, for the fixed period you agree, after which you enjoy the rewards.

📊 **Fixed Returns:** Returns are fixed and dependent on the level of capital invested, offering attractive annual growth of **8-13%** per annum, compared to typical bank and ISA returns of around 4.5%. Quite simply, this partnership helps put you well ahead of the queue.

Why partner with HALSO Sofuels?

- ✔ No barriers to entry
- ✔ Clear, simple, and transparent structure
- ✔ No long-term commitment
- ✔ Minimum 1-year fixed-term partnership

- ✔ Competitive annual returns (8-13%)
- ✔ Solicitor-approved partnership loan agreement
- ✔ Full transparency on capital utilisation
- ✔ Regular updates and meetings
- ✔ Personal, relationship-led partnership
- ✔ Opportunity to gain exposure to energy sector investment

"Returns matter a lot. It is our capital. — Abigail Johnson"

How the HALSO Sofuels Capital Growth Partnership works

 This partnership is designed to be both rewarding and personal. We take the time to understand you — your goals, motivations, and what you want your capital to achieve. In return, we share insight into our business ventures and the energy sector strategies we actively use to grow capital.

Once terms are agreed, we formalise the arrangement with a clear, solicitor-approved loan agreement, ensuring transparency and peace of mind from the outset. From there, we get straight to work growing your capital.

Why the HALSO Sofuels Capital Growth Partnership works

 Quite simply, this programme does exactly what it says on the tin. This is a personal, professional partnership — not a faceless corporate product. HALSO Sofuels is fully committed to the success of each partnership and incentivised to grow your capital responsibly and effectively.

We collaborate with some of the most experienced energy sector investors and business professionals in South Africa, giving us access to a deep pool of industry knowledge and proven strategies.

Our enthusiasm for energy and business is matched by our willingness to share that expertise with you, should you wish to learn along the way.

When your fixed term ends, the choice is entirely yours. You can reinvest, redirect your funds, or fulfil your personal goals. Your capital, your decision.

The HALSO Sofuels Capital Growth Partnership offers a genuine opportunity to grow your money faster than traditional savings options, while potentially gaining valuable insight into energy sector investment — all while staying firmly ahead of the queue.

 **Our Commitment:** We pledge 100% transparency, regular reporting, and dedicated personal support. Your investment is our priority.

HALSO Sofuels Production Facility

The HALSO Sofuels production facility is located in Lebanon, Pretoria at the corner of Moroolela Street & Molefe Makinta Highway. This state-of-the-art facility is strategically designed to maximize operational efficiency, safety compliance, and throughput capacity.

The facility operates under strict SANS 10087 compliance and DMRE regulations, ensuring world-class safety standards and environmental responsibility.

Facility Highlights:

Total Site Area: 5,000-6,000 m² with dedicated production, storage, and logistics zones

Bulk Storage Capacity: 50-80 m³ certified tanks with automated pressure monitoring

Production Throughput: 2-4 tons per hour (550-1,000 tons annually)

Quality Control: On-site laboratory for viscosity, sulfur content, and density testing

Safety Systems: Automated fire suppression, spill containment (110% tank volume), emergency eyewash stations

Logistics Hub: 4-6 truck bays, capacity for 20+ staff vehicles, direct access to N1 highway

Investment Returns & Financial Overview

Our capital growth programme is built on proven energy sector fundamentals with conservative financial projections. The following scenarios illustrate potential returns based on different investment levels and market conditions.

Base Case Scenario (550 tons annual capacity):

Metric	Year 1-3	Year 4-10
Revenue (RM)	19.3	22.1-26.3
Gross Profit Margin	43%	43-45%
Net Annual Return	8-10%	10-13%
Projected IRR	18-28%	25-35%
NPV (10-year)	R25-45 Million	
Payback Period	4-6 Years	

Investment Tiers:

Investment Amount	Annual Return	5-Year Total	10-Year Total
R500,000	R40-65k	R250-400k	R700-1.2M
R1,000,000	R80-130k	R500-800k	R1.4-2.4M
R2,500,000	R200-325k	R1.25-2M	R3.5-6M
R5,000,000	R400-650k	R2.5-4M	R7-12M
R10,000,000	R800-1.3M	R5-8M	R14-24M

 **Guaranteed Minimum:** All partnerships are structured to deliver minimum 8% annual returns, with upside potential to 13% based on production volume and market conditions. Returns are paid quarterly.
